

PIMCO Emerging Markets Advantage Local Bond Index UCITS ETF

ETF CLASS ACCUMULATION AND INCOME SHARES

Fund Description

The PIMCO Emerging Markets Advantage Local Bond Index UCITS ETF (Dist.) aims to provide a return that closely corresponds, before fees and expenses, to the total return of the PIMCO Emerging Markets Advantage Local Currency Bond Index.

Potential Investor Benefits

The Fund offers efficient exposure to emerging markets local debt. By focusing on countries with higher GDP rather than higher debt levels, the Fund is designed to capture a larger share of emerging markets growth and potentially provide superior risk-adjusted returns than products benchmarked to traditional indices.

Potential Fund Advantage

- Uses a GDP-weighted index and focuses on countries with higher GDP rather than higher debt levels
- Relies on PIMCO's multi-decade expertise in managing emerging markets debt
- Leverages PIMCO's smart-passive technology and risk-factor optimization process to achieve efficient replication of the index
- Transparent: ETF holdings are published daily

Risk and Reward profile

Credit and Default Risk: A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk. **Currency Risk:** Changes in exchange rates may cause the value of investments to decrease or increase. **Derivatives and Counterparty Risk:** The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations. **Emerging Markets Risk:** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk. Investments in these markets may expose the fund to larger gains or losses. **Fixed Income Risk:** There is a risk that the institution which issued the securities will fail, which would result in a loss of income to the fund. Fixed income values are likely to fall if interest rates rise. **Risk of Using Derivatives:** In order to reach its investment objective, the fund may use swaps, including futures and forwards. Such derivatives may result in gains or losses that are greater than the original amount invested. **Liquidity Risk:** Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price. **Interest Rate Risk:** Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices). **China InterBank Bond Market ("CIBM"):** The fund may be exposed to liquidity risks, settlement risks, default of counterparties and market volatility associated with CIBM. In addition, the CIBM rules are new and still subject to further clarification and/or changes, which may adversely affect the fund's capability to invest in the CIBM. **Index Tracking Risk:** Fund performance can potentially deviate from the reference index due to market conditions, transaction costs and different replication techniques such as optimization & sampling

All periods longer than one year are annualised. SI is the performance since inception.

ABOUT THE BENCHMARK

The PIMCO Emerging Markets Advantage Local Currency Bond Index tracks the performance of a GDP-weighted basket of emerging market local government bonds, currencies, or currency forwards, subject to a maximum exposure of 15% per country. Countries are selected, and their weights are determined, annually. Qualifying countries must have a minimum average sovereign rating of BB- (with such ratings provided by recognized rating agencies), represent greater than 0.3% of world GDP, designated as mid or low income based on Gross National Income per capita as published by the World Bank and have a liquid local bond or FX market. Countries whose internal or external borrowing is subject to EU or U.S. sanctions are not eligible for the Index. It is not possible to invest directly in an unmanaged index.

Unless otherwise stated in the prospectus or in the relevant key investor information document/ key information document, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes. Marketing Communication

This is a marketing communication. This is not a contractually binding document and its issuance is not mandated under any law or regulation of the European Union or the United Kingdom. This marketing communication does not include sufficient detail to enable the recipient to make an informed investment decision. Please refer to the Prospectus of the UCITS and to the KIID before making any final investment decisions.

[†] Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index. [Ⓢ]PIMCO calculates a Fund's Estimated Yield to Maturity by averaging the yield to maturity of each security held in the Fund on a market weighted basis. PIMCO sources each security's yield to maturity from PIMCO's Portfolio Analytics database. When not available in PIMCO's Portfolio Analytics database, PIMCO sources the security's yield to maturity from Bloomberg. When not available in either database, PIMCO will assign a yield to maturity for that security from a PIMCO matrix based on prior data. The source data used in such circumstances is a static metric and PIMCO makes no representation as to the accuracy of the data for the purposes of calculating the Estimated Yield to Maturity. The Estimated Yield to Maturity is provided for illustrative purposes only and should not be relied upon as a primary basis for an investment decision and should not be interpreted as a guarantee or prediction of future performance of the Fund or the likely returns of any investment.

Important information: Your capital is at risk. You may not get back the amount you invested. Past performance is not a guarantee or reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. The information in this document is not intended as investment advice or as a recommendation to invest in any particular asset class, security or strategy. The information provided is for illustrative purposes only, and it should not be relied upon as investment advice or as a recommendation to buy or sell securities. Investors should seek independent professional advice prior to investing. Any investment in an ETF should be made on the basis of the relevant Prospectus and Key Investor Information Documents, including consideration of the investment objective, risks, charges and expenses. Further information on the ETFs, their Prospectus, Key Investor Information Documents and Supplements are available at www.pimco.co.uk or from your financial adviser or broker. For actively managed ETFs, further information on the use of benchmarks or indices is set out in the Prospectus and relevant Supplement. The distribution and the offering of ETFs in certain jurisdictions may be restricted by law. This information does not constitute an offer or solicitation by anyone in any jurisdiction in which such an offer is not authorised or to any person to whom it is unlawful to make such an offer or solicitation. This document is not for distribution to, or for the attention of, US or Canadian persons. UCITS ETF's units / shares purchased on the secondary market cannot usually be sold directly back to UCITS ETF. Investors must buy and sell units / shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units / shares and may receive less than the current net asset value when selling them.
